Recommendations by Michael Ochsner:

- Special issue summarising the work of the COST Action European Network for Research Evaluation in the Social Sciences and Humanities. There is a lot of policy-relevant information. What I think is interesting is the fact that there are very different types of texts: policy paper-style, research article, roundtable discussion and essays.

- To the German speaking members, a new book might be of interest, it is about performance assessment of research and teaching: <https://doi.org/10.1515/9783110689884>
